Examiner's Response

1. In response to applicant's amendment filed 3-4-04, all the amendments to the specification and claims have been entered. The examiner has considered the new presentation of claims and applicant's arguments in view of the disclosure and the present state of the prior art. And it is the examiner's opinion that the claims are unpatentable for the reasons set forth in this Office action:

Specification

2. The amendment filed 3-4-03 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: The inclusion of "picking up" and "organizing" in lines 5-6 and 7 of the abstract.

Applicant is required to cancel the new matter in the reply to this Office Action.

3. The disclosure is objected to because of the following informalities: The specification should include the section headings listed below.

Appropriate correction is required.

Art Unit: 2635

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a **section heading**. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Art Unit: 2635

Claim Objections

4. Claims 1 is objected to because of the following informalities: In claim 1, line 12, "information is representative" should be --information that is representative-- to mirror the language of line 10. In line 22, "device" should be --said device-- or --said monitoring device-- to make it clear that the limitation is directed to the monitoring device and not some other device. Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 1-4, 6, 9-13, 19, 22-25, 28-33 and 36-37 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification as originally filed lacks support for the new

Art Unit: 2635

matter in the amended claims 1 and 19 including selecting, picking up, organizing and storing the diagnostic and/or statistical information available on said network from said electronic control systems, and device making said organized information explicit to a user or the other devices on or outside the network. Amended claims 6 and 25 include the new matter of picking up, organizing and making explicit organized functional information not supported by the specification as originally filed. In particular, page 9 lines 3-24 and page 16 lines 9-17 disclose selecting, storing and making explicit functional, diagnostic and statistical information, but does not describe picking up this information, organizing this information nor making explicit organized information. Applicant's arguments do not point out any support for this language. Regarding "picking up," the closest the examiner could find to this in the specification was receiving or collecting information in pages 9 and 16, If "picking up" corresponds to the receiving or collecting information on Pages 9 and 16, then this should be clarified by distinctly claiming the disclosed language and pointing out support in the arguments. Regarding organizing, the closest the examiner could find to this in the specification was updating in pages 9 and 16. Updating cannot be the support for the organizing

Art Unit: 2635

limitation since updating is separately claimed in dependent claims 2, 9-10 and 22.

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 1-4, 6, 9-13, 19, 22-25, 28-33 and 36-37 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, "one or more household appliances" in line 2 and "at least one of the appliances includes an electronic control system" in lines 3-4 ^{is} lacks not clear antecedent bases for "said electronic control systems" in lines 21-22 since plural systems and plural appliances are not required by the "one or more" and "at least one" language. Claim 19 lacks clear antecedent bases for "systems" in line 22 for the same reason. If applicant intends to claim a plurality of appliances and/or systems, then such should be clearly claimed.

Response to Arguments

9. Applicant's arguments with respect to claims 1-4, 6, 9-13, 19, 22-25, 28-33 and 36-37 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
